

MultiMotor ANPR^{AI}

Eliminating underperformance in ANPR systems

Lost parkings, charging the wrong customers and other errors requiring costly manual interventions steal away profits from ANPR system operators and owners.

Two years of operation and more than 50 million images processed prove that the MultiMotor ANPR^{AI} will deliver significant value.

Main benefits & features

Increased profit

Capture lost parkings and reduce manual work

Improved reputation

Eliminate wrong charging and bad user experiences

Universal & simple

Works with all systems with an easy, non-intrusive setup

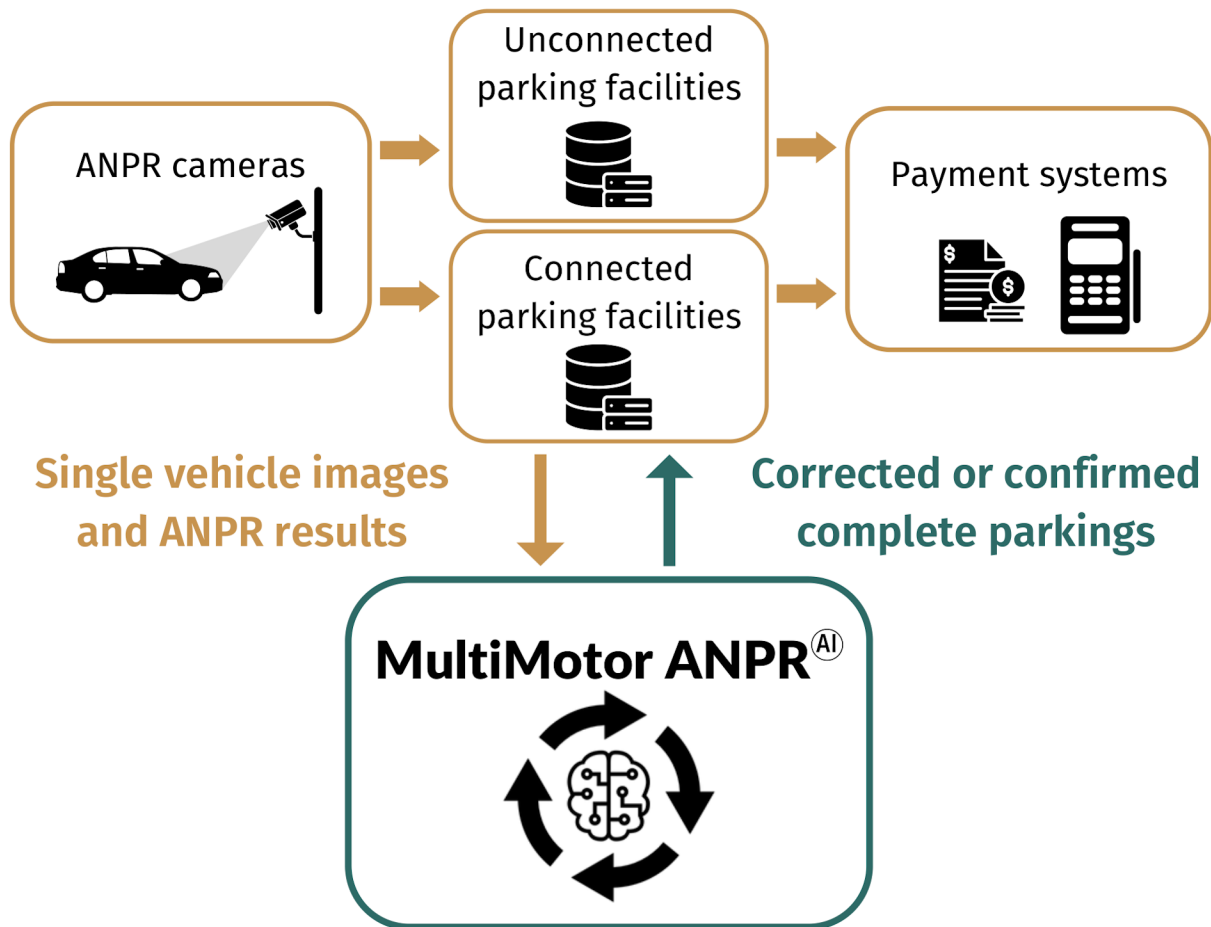

Service

Supported by dedicated, highly competent imaging specialists
